Sporting Bots Limited does not guarantee winnings and cannot be held liable for losses resulting from the use of information obtained from within this document or from our sites.

This report is for information only. In no way we are advising you to act on the report or to bet on live markets. Please seek proper advice if you are unsure what to do.

### **Warning**

Betting can be very risky and users should only speculate with money that they can comfortably afford to lose and should ensure that the risks involved are fully understood, seeking advice if necessary.

### **The past does not equal the future.**

Although the information in this report was gathered by using the Grey Horse Bot installed on one of our servers it doesn't mean either using your own version or using selections manually will produce the same results.

Our past results do NOT in any way guarantee similar or like future results. Please keep this in mind when reading the report.

**Please gamble responsibly**

**Please read the extra disclaimer at the bottom of this report.**

**Date:** 15/02/2013

**System:** <http://www.acenaps.co.uk> (Take Your Pick)

**Test Date Range:** 16/08/2012 to 15/03/2012

**Test Price range:** 1.02 to 999 (2.0 to 999 optimum price range)

**Number of selections:** 165 (81 at optimum price range)

**Profit (Pts):** 56.49 (62.24 pts at optimum price range)

**ROI:** 34.24% (76.84% at optimum price range)

**Acenaps** was primarily a “Back” service but David turned to the “Dark Side” and started adding lay selections.

This report is based on the selections we had matched through our test Grey Horse Bot.

<http://acenaps.co.uk/acenaps-ghb.xls>

(Please note we didn't run bots over the Christmas period because we wanted to do some server maintenance.)

You can see all the official results as put together by David here:

<http://acenaps.co.uk/TakeYourPick.xls>

**NEWS:** David has now decided to release 50 5 copies of the “Take Your Pick” selection method.

[Click here to read what I think about it.](#)

My question for this report has always been...

### Should David have added the lay selections?

As this is a “One a Day” type service you are not going to make a fortune from it but as you can see from the results the back part of the system does do reasonably well especially if you stay away from any selections under 2.00.

Although even if you don't a ROI of 27.65% is pretty amazing and I think this would have stayed consistent even if we had started following the selections earlier.

Using 1% of your current bank as your stake has produced a slightly better return over the test period compared to fixed stake.

All Selections

**Fixed stake:** 56.49

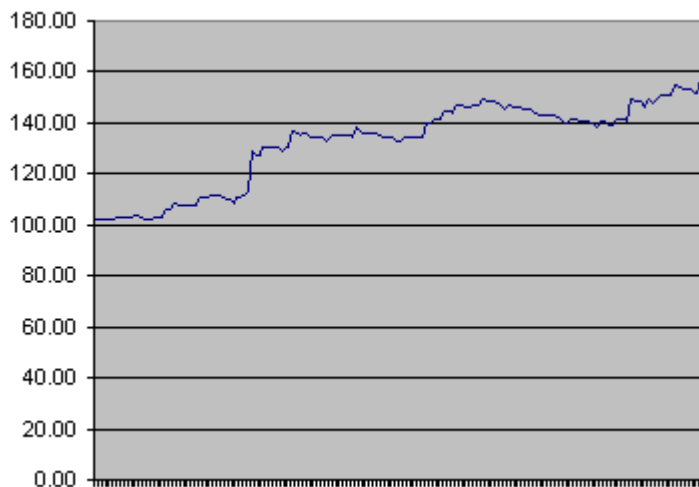

**1% of current bank (presuming 100pt start bank):** 70.46

2.00 to 999

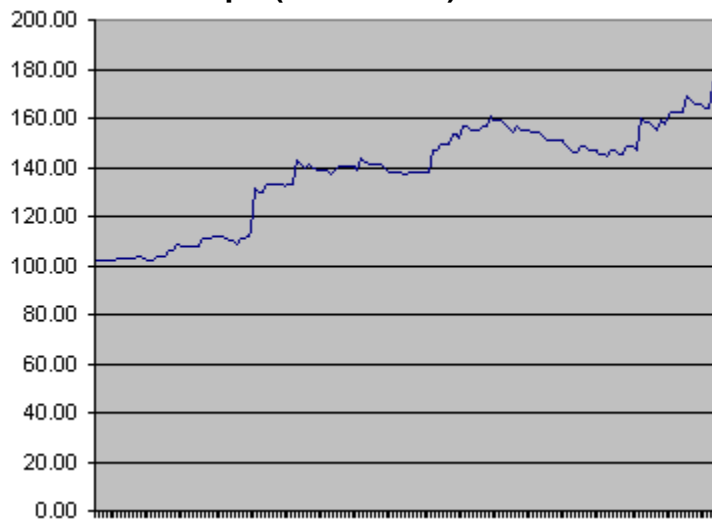

**Fixed stake:** 62.24

**1% of current bank (presuming 100pt start bank):** 80.94

### Fixed Stake Graph (2.00 to 999).

### 1% of Bank Graph (2.00 to 999)..

I know this system is a really “Slower burner” and the downward cycles make it feel even worse but if you can just let it get on it with it then the rewards are not bad for a pretty simple system to follow.

### So what about the lays?

A couple of points to make about our results...

Up until 19th August we were restricting the price range we were getting matched at as per David’s instructions.

So we missed a lot of winners in the beginning as you can see from David’s own results.

After that we decided to open up the odds range from 1.02 to 999 and use 10 point maximum liability stake.

Our test [Grey Horse Bot](#) has been betting on both back and lay selections together.

One of the issues with lay betting is getting enough winners so that when you do lose (and you will) you can still make a profit.

One of the reasons we opened up the price range is that we wanted to see if David’s idea of only laying horses 11.00 or under was valid.

We have seen several services mention this in the past and some of our own testing has shown they are not always correct in their assumptions.

### In the last report I wrote...

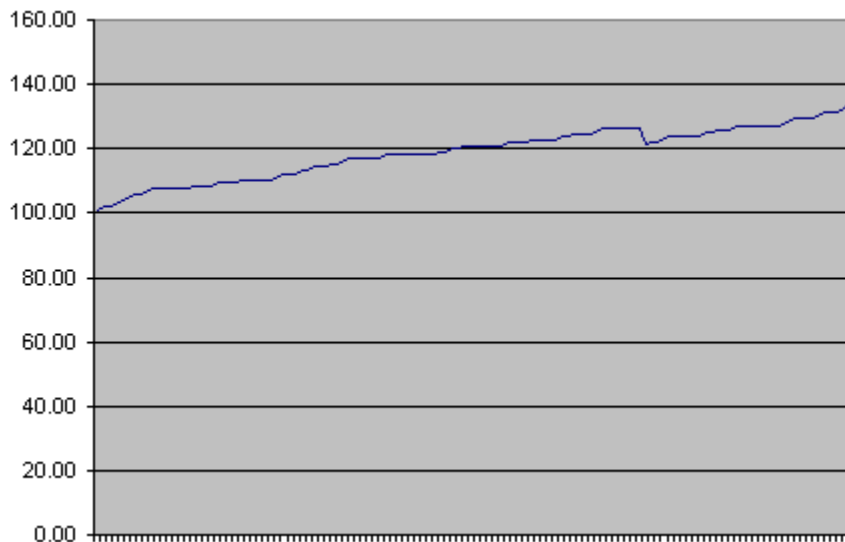

“Since we have been testing the [Acenaps](#) system staking to liability on all lays has actually produced a small profit.”

Interestingly using fixed stakes to a maximum price of 11.00 produced nearly 18.4 pts profit so it appears David is correct.

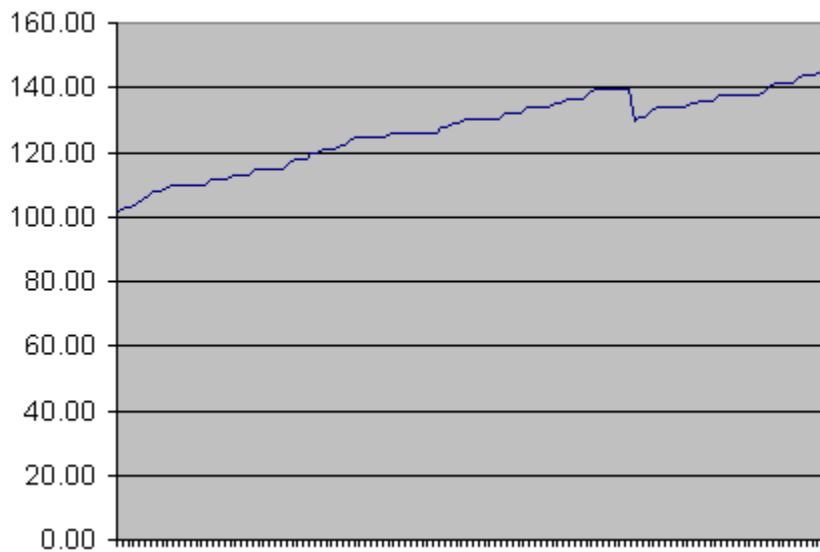

But I don't think that is where the real profit is...

I have mentioned in the last two reports that I think the real profit is somewhere between 5 or 6 and 11.

This is how the charts look using a fixed stake with the odds range set from 6 to 11.

And this is using liability.

The lays have only lost once between this price range and that is why the return shows 97.62%.

### **So do I think David should have added the lay system?**

Well I don't think it has hurt the results if you stick to David's recommendations.

If you take the 62.24 pts profit from the backs (2.00 to 999) and even just 18 pts from the lays (1.02 to 11) then that is getting close to 80 points profit over about 7 months.

Ok it's only around 12 pts a month (which is still not that bad considering November wasn't good at all and we have had a Christmas break) and it's more than a lot of services can boast.

But as I have shown...With a bit of tweaking there could be even more profit available from the lay side.

Using systems is always about testing and finding out what works the best (Something we like doing at Sporting Bots Labs).

One other thing I would like to mention.

David has several other systems in [Acenaps](#) as well as well and maybe we should start testing a few of those to see if there could be even more profit available from the service.

If you want to read more about his service then [Click Here](#).

David T. has decided to release just 50 copies of the exact same system he uses to get the "Take your Pick" selections.

[Check out what I have to say about it here.](#)

**Thank you**  
**Malcolm & The Team**

### **READ THIS - IT'S IMPORTANT:**

#### **Disclaimer:**

This report is for information only. In no way we are advising you to act on the report or to bet on live markets. Please seek proper advice if you are unsure what to do.

Our results and reports are based on betting through Bots on the Betfair market around 60 seconds before the off.

Because our prices are based on what we have achieved on the market and not SP or BSP we can only show what happened to us.

Unmatched bets, prices out of range and other factors may influence your results compared to ours so we can in no way guarantee that you will achieve similar results.

In fact your results could be worse.

Please see Betfair's information on how they match bets.

Matched bets can be influenced by timing, stake amounts and other factors.

Online or off line betting is not appropriate for everyone.

There is a substantial risk of loss associated with betting. Losses can and will occur.

No system or methodology has ever been developed that can guarantee profits or ensure freedom from losses.

No representation or implication is being made that using the information on this report/article will generate profits or ensure freedom from losses.

Hypothetical performance results have many inherent limitations, some of which are described below.

No representation is being made that any account will or is likely to achieve profits or

losses similar to those shown.

In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular betting program.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight.

In addition, hypothetical betting does not involve financial risk, and no hypothetical betting record can completely account for the impact of financial risk in actual betting.

For example, the ability to withstand losses or to adhere to a particular betting program in spite of betting losses are material points which can also adversely affect betting results.

There are numerous other factors related to the markets in general or to the implementation of any specific betting program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual betting results.

**HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS.**

**UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL BETTING.**

**ALSO, SINCE THE BETS HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY.**

**SIMULATED BETTING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT.**

**NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.**
