This report is for information only. In no way we are advising you to act on the report or to bet on live markets. Please seek proper advice if you are unsure what to do.

Warning

Betting can be very risky and users should only speculate with money that they can comfortably afford to lose and should ensure that the risks involved are fully understood, seeking advice if necessary.

The past does not equal the future.

Please note all our prices are quoted as BSP (Betfairs Starting Price)

Our past results do NOT in any way guarantee similar or like future results.

Please keep this in mind when reading the report.

Please gamble responsibly

http://www.gambleaware.co.uk/

Please read the extra disclaimer at the bottom of this report.

NOTE: This report was created on the 01/08/2013 and included results up until the end of racing on the 31/07/2013.

Welcome to the latest report on theORsystem.

See the results to the 1st of August here.

Now by the profit from the results you could be forgiven for thinking the system has gone right down hill.

At BSP it is only showing 12.28 points profit since we started it and although the spread sheet shows quite clearly that the system did quite well at first it then shows a drop back down to almost zero.

So what's happened?

Bank	£500.00	**Stike Rate:**	19%	**Losers:**	1180
Stake	£1.00	**Needed:**	18.19%	**LLR:**	26
Max odds	999.00	**Average Odds:**	4.50	**How Often:**	1
Min Odds	1.02	**Winners:**	279		
Profit	12.288	**Selections:**	1459	**LLR Prob:**	34
Pts	12.29	**ROI:**	0.84%	**5000 LLR Prob:**	40

A couple of things to note:

Strike rate has dropped to 19% from a height of about 22%
Average winning price has dropped from around 5.10 to 4.50

Let me show you what that means…

At its height strike rate was around 22%

If it had stayed the same then we would probably be closer to 321 winners.

At an average price (at the moment) of 4.50 that would have been an extra 42 points about 40 points after commission.

But that is not where the real problem is…

Looking at the average price we can see where things have been going wrong.

279 winners at 5.10 = 1422 – 1180(losers) = 242 (Around 170.9 points after commission)

279 winners at 4.50 = 1255 – 1180(losers) = 75 (Around 12.25 after commission)

That is why I am always saying that price matters far more than you think.
(see this other report of mine as well).

Even though the strike rate has dropped if the average price had of held up then we would still be looking at some nice profit.

And a better strike rate would of helped as well.

So performance wise the system hasn't seen a big change but the results of the Strike Rate dropping and a drop in the average price accumulated in a total wipe out of profits.

It maybe that if you are using the Grey Horse Bot and betting before the off you could have a better average price.

If you have been following my emails you will have probably seen that I have been working on a new piece of software called the SPB System Builder.

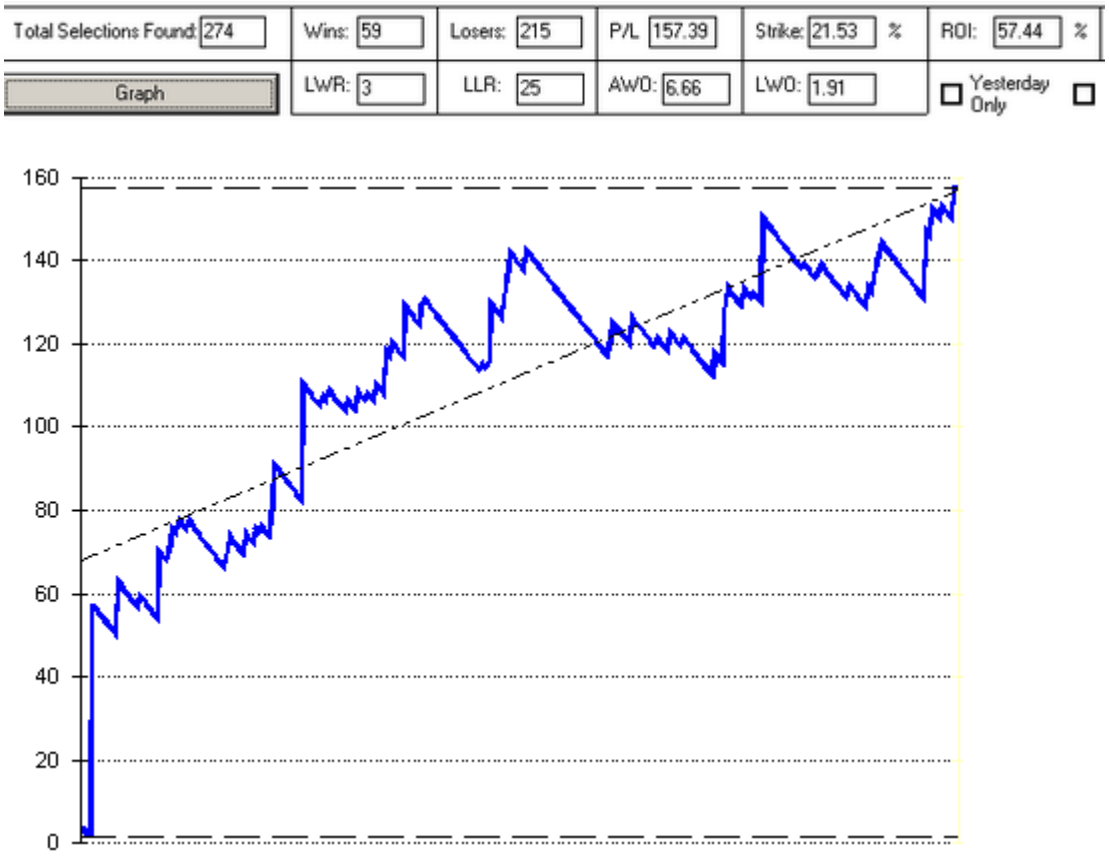
This software has allowed me to dig deeper into our results files and play out scenarios in ways I have never been able to do before.

That doesn't mean I am giving up on theORsystem…

What it does mean though is that I have been able to take the basis of the system and analyse it using the SPB System Builder to see if I can improve the system.

And that is exactly what I did?

And I found this…



Now there are a couple of things you should know about this system.

One is that the results look a little better because of a nice win at the price of 58 from the start of the results so without that winner it is nearer 100 points profit.

Secondly it isn't exactly a smooth ride to get there.

So what I decided to do is give you a second piece of software so you can monitor these selections.

http://www.greyhorsebot.co.uk/ORsystem2.exe

I have also set you up a live page for this system and the original or system so that you can now follow both daily.

http://greyhorsebot.co.uk/theORsystem-2.asp

The software works the same as the original and uses the same login the only difference is that it gets the theORsystem2 tips.

The Place System…

A few people have also been asking me about the results to the bonus place system.

I am going to update the results very soon but I am working on a system to run place scenarios and want to spend the time doing that at the moment.

But I will do it shortly.

Thank you for reading this report I really do appreciate it.

Malcolm

Disclaimer:

This report is for information only. In no way we are advising you to act on the report or to bet on live markets. Please seek proper advice if you are unsure what to do.

Our results and reports are based on betting through Bots on the Betfair market around 60 seconds before the off.

Because our prices are based on what we have achieved on the market and not SP or BSP we can only show what happened to us.

Unmatched bets, prices out of range and other factors may influence your results compared to ours so we can in no way guarantee that you will achieve similar results.

In fact your results could be worse.

Please see Betfair's information on how they match bets.

Matched bets can be influenced by timing, stake amounts and other factors.

Online or off line betting is not appropriate for everyone.

There is a substantial risk of loss associated with betting. Losses can and will occur.

No system or methodology has ever been developed that can guarantee profits or ensure freedom from losses.

No representation or implication is being made that using the information on this report/article will generate profits or ensure freedom from losses.

Hypothetical performance results have many inherent limitations, some of which are described below.

No representation is being made that any account will or is likely to achieve profits or losses similar to those shown.

In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular betting program.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight.

In addition, hypothetical betting does not involve financial risk, and no hypothetical betting record can completely account for the impact of financial risk in actual betting.

For example, the ability to withstand losses or to adhere to a particular betting program in spite of betting losses are material points which can also adversely affect betting results.

There are numerous other factors related to the markets in general or to the implementation of any specific betting program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual betting results.

HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS.

UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL BETTING.

ALSO, SINCE THE BETS HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY.

SIMULATED BETTING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT.

NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.
