I must admit I have never been too big of a fan of these systems where you try to pick more than one runner in a race to win.

Well that was until Mark started sending me his selections.

To be very honest I didn't take much notice at first because I get a lot of people sending me selections and two things generally happen.

- 1. They don't make profit.**
- 2. The person sending them disappears (too much like hard work)**

I have this test which may be a little mean but it does tend to sort out if the person sending me the information is really serious about the selections.

The person must send me the selections in the morning daily and an update on what happened the day before.

And generally they must do this for at least 3 months.

As you can imagine not many people make it through this test.

To be honest I was a little more "mean" with Mark purely because I wasn't convinced about his "**Two to Tango**" (I think he likes dancing) idea.

Anyway after a few months I finally gave in and decided to have a good look at them.

Well maybe I was wrong this time and should have taken notice earlier....

But there were a couple of reasons why I wasn't sure about giving the selections as a [Grey Horse Bot](#) bonus.

Firstly he told me he had a rule where if either of the runners was a Non Runner then it is replaced with the next available selection.

The other was if either of the runners had and SP over 16/1 (close to the off) then you should only bet on the lower priced selection.

I knew both of these rules are difficult to implement with a bot so after some discussion with Mark we decided on the following...

If either of the selections become a NR then we will invoke a "No Bet" rule but only based on this happening before we get matched 60 seconds before the off.

We can include this feature in the tips file that the [Grey Horse Bot](#) will download everyday so you don't have to worry about it.

As regard to the second rule, after looking at the results this rule was only used a couple of times and on both occasions the new selection didn't win anyway.

So we decided to ignore this rule altogether.

Who is Mark?

I have corresponded with him a few times over the last few years and I know he has been working on several ideas since we started chatting.

But this was the first time I have actually been watching his selections which he tells me is an accumulation of a lot of different back systems rolled into one.

From what I can gather he has to do a lot of work to find the daily selections but it sounds like he enjoys it because he is always jolly about the system.

The fact that he has not stopped sending me the selections over the last few months and he is happy for me to do a trial, is, I suppose proof that he thinks he has a good idea.

Apart from that I don't know too much about him but I will use this testing time to ask him questions and get to know him a bit better.

Anyway what I want to find out is...

...Will these selections be profitable when using Betfair?

So from today (05/03/2013) we will start a test to see what happens.

Ok now for the results.

([download the results here.](#))

The spreadsheet is his (with a little help from me) and although I can pretty much vouch for the last 4 months (not before) it is based on SP.

But I always think the real trial comes when you bet live and actually see what happens when you put the selections into the market.

(This is the bit I like ☺)

I have been talking with Mark about staking and we decided to make it simple and keep to even stakes on both.

Mark has tried various other ideas but to be honest level stakes is as good as any.

Of course if the system continues to perform as it has in the past then percentage of bank ([see the spreadsheet](#)) is likely to be a better option but it is too early to think about that at the moment.

There could also be a case to Dutch but I suspect because of the low prices of many of the selections it probably wouldn't be worth it and again it's a question for another day.

Anyway I have added the bonus (Number 15) to the Grey Horse Bot member's area.

I will keep you informed on how they perform over the next few weeks.

Thank you as always for reading I really appreciate it.

Malcolm

P.S. This month we have opened up 5 life time places with some great bonuses. [Click Here](#) to find out more.

P.P.S. This bonus has also been added to the GHBLite member's area. <http://ghblite.co.uk/>

Disclaimer:

This report is for information only. In no way we are advising you to act on the report or to bet on live markets. Please seek proper advice if you are unsure what to do.

Our results and reports are based on betting through Bots on the Betfair market around 60 seconds before the off.

Because our prices are based on what we have achieved on the market and not SP or BSP we can only show what happened to us.

Unmatched bets, prices out of range and other factors may influence your results compared to ours so we can in no way guarantee that you will achieve similar results.

In fact your results could be worse.

Please see Betfair's information on how they match bets.

Matched bets can be influenced by timing, stake amounts and other factors.

Online or off line betting is not appropriate for everyone.

There is a substantial risk of loss associated with betting. Losses can and will occur.

No system or methodology has ever been developed that can guarantee profits or ensure freedom from losses.

No representation or implication is being made that using the information on this report/article will generate profits or ensure freedom from losses.

Hypothetical performance results have many inherent limitations, some of which are described below.

No representation is being made that any account will or is likely to achieve profits or losses similar to those shown.

In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular betting program.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight.

In addition, hypothetical betting does not involve financial risk, and no hypothetical betting record can completely account for the impact of financial risk in actual betting.

For example, the ability to withstand losses or to adhere to a particular betting program in spite of betting losses are material points which can also adversely affect betting results.

There are numerous other factors related to the markets in general or to the implementation of any specific betting program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual betting results.

HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS.

UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL BETTING.

ALSO, SINCE THE BETS HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY.

SIMULATED BETTING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT.

NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.
