Hi

If you are a member of the [Greyhorse bot](#) community then you couldn't help to notice I have added a new **FREE** piece of Greyhound software to the members bonus area.

That and the fact I have stopped going on about it for the last couple of weeks 😊

We now have over 25,000 results to play about with...

...So I thought it would be a good time to look at some ideas that you may be able to use yourself to make some profit.

Most of these will be using my ratings...

...But I have added one or two that you can use without the software.

A couple of important things before we go on.

In this report I am going to be talking about "Backing" and "Laying" and all will be based on Betfair's BSP (Minus 2% commission).

In most cases users will be betting before the off so may get slightly different odds to those advertised which will of course make a difference to the results one way or the other.

Laying will cost you more than your stake so make sure you understand the losses.

On a personal note I have been playing on the Greyhound markets for a few months now and I can tell you that you will have good and bad days...

...Greyhounds are about knowing what your liability is and excepting that you will have bad days (several of them sometimes) but the good days should make up for it.

Just be careful I want you to succeed but you will only do that if you manage your bank and stakes sensibly.

Please remember these are just ideas that seem to be showing a profit...

...But as we all know the **"Proof of the pudding..."**.

I am testing some of these ideas myself and will report on the ones that appear to work in the near future.

Testing.

I am a firm believer in testing but growing your bank at the same time.

That is why personally I tend to choose a % of bank (I use a £40 or £50 session bank) as my "go to" way to test systems.

By using this method if you do hit something that works then your stake will just grow naturally as you make more profit...

...But if it does not go to plan then your stakes will immediately drop down as your bank diminishes.

There are other ways you can do this but, in every case, set aside an amount you are prepared to test with and possibly lose if things go horribly wrong.

Are 25000 results enough?

I have already mentioned that we now have over 25,000 results in the Database (And probably more by the time you read this)...

...The problem is just setting a few filters can drop this down to below 1000 selections.

And as you will see sometimes as low as 200 or 300.

Who knows when enough is?

All you can do is keep looking at the results and even trying out some ideas to see what happens.

I am sure we will need more data but at least the software gives us a chance to try out ideas and see if they work.

But the message is that it's still early days on the Data available but at least we have something...

...Which must be better than nothing!

Ok on with the ideas...

...Let us start with Backing.

Backing Idea 1:

Bsp >= 1.01 - 1000		Mal's Rating 1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/>

						22.27%		AWP(-1)																																																										
								LWR (LLR)																																																										
								3(18)																																																										
<p style="text-align: center;">Day By Day Graph</p>																																																																		

By only selecting Trap 1 and Mal's Rating 1 we dropped the selections down to just 431.

Hardly enough to form any real opinion on but it is a good place to run a test just to see if it does work.

There are some drops there you would have to be careful of but it looks interesting.

If you add in Trap 2 it makes it a little more interesting.

Select traps. 1. 2. 3. 4. 5. 6.

						85.75%		5.49
								LWR (LLR)
								47(3)

Day By Day Graph

But you may want to put in a little bit of extra work like finding courses that may have a bias towards trap 5 losing...

..Henl seems to have.

course:
 Done
 Harl
 Henl
 Hove
 Kinsl
 Moom

Distance(max 10):
 None
 225
 238
 261
 264

Class(max 10):
 None
 A1
 A10
 A11
 A2

Only Daily Profit. Just Round-up ▾

Selecting some courses, classes or specific distances may cause 500 errors while results are still low.

Type of Bet: Lay ▾ Update Results

No.	Date	Time	Course	Trap	Result	Price	W/L	P/L	
Profit Day 30 : 10.78 ALP= 0 Losers=0 Selections= 11 S/R =100									
Total P/L		Avg Per Day		Selections	Winners	Losers	S/R	ALP(-1)	LWR (LLR)
107.51		3.58		371	332	39	89.49%	5.59	26(2)

Day By Day Graph

The graph shows a fluctuating line representing daily profit/loss. The y-axis is labeled from -50pt to 150pt in increments of 20pt. The x-axis is labeled from 1 to 30. The line starts at approximately 10pt on day 1, dips to -10pt on day 2, and then generally trends upwards with some volatility, reaching a peak of 47pt on day 18. After day 18, the line continues to rise, ending at approximately 110pt on day 30.

Lay Idea 3

One of those “Saturday” only methods.

READ THIS - IT'S IMPORTANT: Disclaimer:

This guide /report is for information only. In no way we are advising you to act on the guide /report or to bet on live markets. Please seek proper advice if you are unsure what to do.

Unmatched bets, prices out of range and other factors may influence your results compared to ours so we can in no way guarantee that you will achieve similar results. In fact your results could be worse.

Please see Betfair’s information on how they match bets.

Matched bets can be influenced by timing, stake amounts and other factors.

Online or off line betting is not appropriate for everyone.

There is a substantial risk of loss associated with betting. Losses can and will occur. No system or methodology has ever been developed that can guarantee profits or ensure freedom from losses. No representation or implication is being made that using the information on this guide /report/article will generate profits or ensure freedom from losses. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular betting program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight.

In addition, hypothetical betting does not involve financial risk, and no hypothetical betting record can completely account for the impact of financial risk in actual betting. For example, the ability to withstand losses or to adhere to a particular betting program in spite of betting losses are material points which can also adversely affect betting results. There are numerous other factors related to the markets in general or to the implementation of any specific betting program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual betting results.

HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL BETTING.

ALSO, SINCE THE BETS HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED BETTING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT.

NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN
